Manual license installation

1. License details will tell you the machine ID the license is bound to, until which date the license is valid, the current and licensed user count, the maximum amount of events in one data model that is licensed and the current and the licensed number of data models.
2. The manual license installation allows you to install the license if you do not have internet access on the same machine on which you can access the Celonis instance.
3. Export license report: This will allow you to export a .csv license report.

Initial License installation

2

Manual license installation

1. Activate license: This button will forward you to my.celonis.com where you can select from the licenses associated with your account. If you do not have a license available here, please contact your Celonis Contact.
2. The manual license installation allows you to install the license if you do not have internet access on the same machine on which you can access the Celonis instance.

3. Export license report: This will allow you to export a .csv license report.

Manual License installation

License

Here you can install a new license manually by going to myCelonis and claiming a license from there. Copy the license key from myCelonis and paste it to the input box. Alternatively, you can use the auto installation mechanism which will retrieve your license automatically. Note that this is only possible when you are connected to the internet.

You will need your Server ID: **1234-1234-1234-1243** **1**

Paste your license key here.

2

Activate online

Install license **3**

1. Copy and paste your server ID to the input field you will find on your SAP Page on the license's settings.
2. Input the generated license key in the textfield.
3. Install the license by confirming the input of your license key.
