

# Settings

In this section, you will learn how to edit your profile, organize permissions and adjust the system settings.

You can open the settings dropdown by clicking on your name *e.g. System Administrator*:

You then have various options to choose from:

- 1) **My profile** - here you can edit your name, E-mail, company, password, language and common separators.
- 2) **Help** - the help section provides you with an overview of ways to get help and reach out to SAP Process Mining by Celonis.
- 3) **Transports** - to import / export existing projects, analysis and datamodels. Please refer to the dedicated [Transport section](#) for further information.
- 4) **Users** - Here you can create and edit [users](#) and their roles.
- 5) **Groups** - Here you can connect users to [groups](#) and manage them.
- 6) **Authorizations** - in this section you can configure [authorization objects](#) to automatically filter datasets for certain users.
- 7) **System Settings** - view exceptions, specify source systems, user & group providers as well as authentication systems and CPML settings [here](#).
- 8) **Log out** - please click here to log out from SAP Process Mining by Celonis 4.
