

# PI Machine Learning

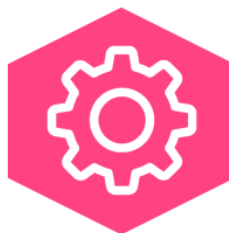

## Machine Learning

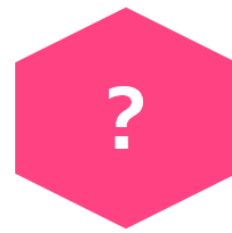

Combine all the powers of Process Mining with the most advanced machine learning and A.I. capabilities. PI Machine Learning allows you to use the full power and all available implementations of the most popular statistical language in the world. A full R-Integration into all Celonis analyses opens up all your Celonis analysis to an unlimited amount of predefined algorithms and libraries. All these can be combined with all Celonis' native functionalities and can be visualized in Celonis' superior data visualization capabilities.
