

Scatter plot

A Scatter plot is another variation of a [Line Chart](#). Instead of a line, the values are therefore displayed as circles.

For analyzing correlations between attributes, this is the component to choose! It allows you to choose one or two dimensions and one aggregation whose relationship will be displayed.

Configuration

The following configuration tabs are available in the component settings:

- | | | |
|---------------------------------|---|---------------------------------------|
| General options | Diagram Area & Legend Options | Position Line Options |
| Dimension Axis | Primary Value Axis | Data Series |
