

# VE: General options

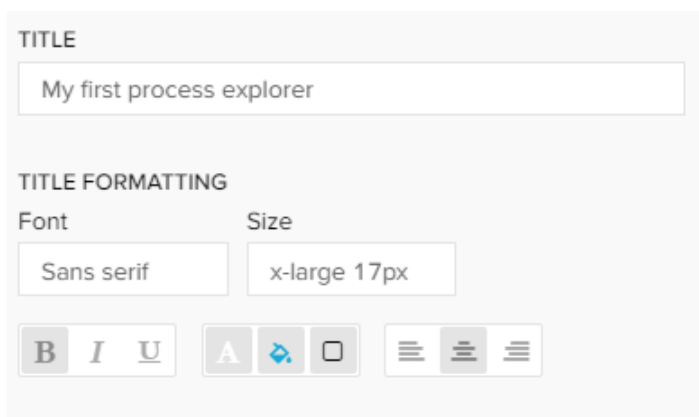

The image shows a 'Variant Explorer' window with a blue header and a close button. Below the header is a dropdown menu set to 'General options'. The main area is divided into sections: 'TITLE' with a text input field containing 'My process'; 'BORDER OPTIONS' with a 'Show Border' checkbox; 'BACKGROUND OPTIONS' with a 'Show background' checkbox; and 'OTHER OPTIONS' with a 'Component is not filtered with selections' checkbox. A 'Done' button is at the bottom right.

---

Type your desired title into the text field.

When a title is set, its formatting option will be shown directly as the next settings and font, size, color and alignment can be defined.

The image shows the 'TITLE' section of the Variant Explorer. It features a text input field with 'My first process explorer'. Below this is the 'TITLE FORMATTING' section, which includes 'Font' (Sans serif) and 'Size' (x-large 17px) dropdowns. At the bottom are three groups of icons: bold, italic, and underline; text color, background color, and fill; and left, center, and right alignment.

---

Activate the "Show Border" checkbox to surround your explorer with a border.

You can specify the thickness, style, color and opacity of the borderline.
