? Unknown Attachment

Before uploading, you have to type in the password. When the transport was uploaded, you can decide to install it into an existing project or to create a new one.

To import the transport to an **existing project**, select the respective folder from the dropdown.

To create a **new project**, click on

If you chose to import an analysis without a data model, you can assign an existing data model from the existing projects.

You have to import the transport to an existing project to be able to do that.

Select the respective data model in the dropdown next to the analysis:

? Unknown Attachment

No Data Model

If you import an analysis without a data model and you don't assign one either, you have to choose the data model when you first open the analysis.
