

Create Transport

Enter the Transports UI with the main menu:

In the transport UI you can find a list of previously exported and imported transports:

? Unknown Attachment

To create a transport click on ? Unknown Attachment .

In the next step you have to specify the title of your transport and a password, which will guarantee a save encryption.

Transport title

My transport from 17.11.2016

Transport password

Enter password for transport encryption

Generate random password

Confirm password for transport encryption

The transport will be encrypted with that password. To guarantee a save encryption, the password has to be at least 8 characters long and has to consist of at least one uppercase character, one lowercase character and one number.

You can also generate a strong password by clicking on ? Unknown Attachment .

Password

The password has to be at least eight characters long and has to consist of at least one uppercase character, one lowercase character and one number to guarantee a save encryption.
