Manage Selections

ⓘ **Please Note**

This chapter explaines advanced selection methods.

You should already be familiar with the basic functionality of Selections.

Click here, to read the Introduction of Selections.

You will need Edit-Rights for this Analysis Document, however, the Edit-Mode does not have to be active.

Selection UI

The Selection UI is a graphical User-Interface. You can open it in the Selection bar with this icon: ⬚✛ .

A window will open, offering you the following selections:

? Unknown Attachment	? Unknown Attachment	? Unknown Attachment
? Unknown Attachment	? Unknown Attachment	? Unknown Attachment

(Click on any selection to learn more).

The selections are ment to be predefined by analysts and used by viewers.

✓ **New Selection**

Every Selection consists of a   ? Unknown Attachment   button in the upper right part.

Use this to open a dropdown – menu and proceed to another selection. This way you don't need to close the selection view to change between different selections.

This button is available in **all selections**.

The different filters will be described in the following sections. Let's start with Attribute Selection!
