PI Conformance

PI

Conformance

With PI Conformance it is possible to compare your plans to reality. You can check if your planned processes in BPMN models are matching the reality how your organization is performing your processes. PI Conformance automatically goes through each single case in the process and extracts all violations to your desired process. Not only the problems and their effect on your major process KPIs are directly obvious, PI Conformance also includes a powerful root cause analysis which immediately tells you where your problems actually derive from.

Usecases

Create a target process
