

# Line

This is another tool to design your analysis sheet.

You can insert lines and turn them into arrows to seperate, surround or highlight certain sections.

*This screenshot shows 4 seperate line components. 3 of them are configured as arrows.*

## Configuration

The following configuration options are available:

Line

✕

Style:

Color

#0085A9

Thickness

Type:

horizontal

▼

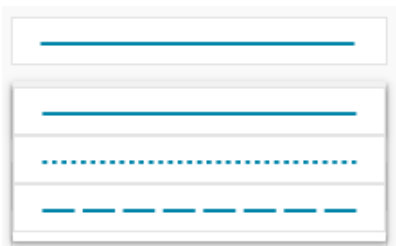

Arrow:

double\_arrow

▼

Start choosing a **style**.

The dropdown menu offers the following options:

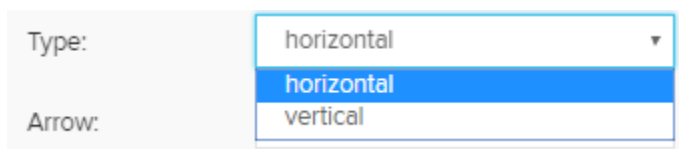

Now let's choose a **color**:

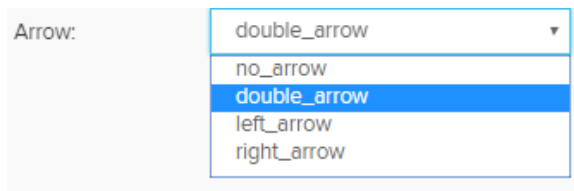

You can choose between different levels of thickness...

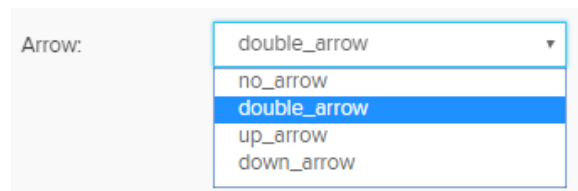

... and set the type of your line, which will determine, whether your line is aligned vertical or horizontal:

Finally, you can set your line to be an arrow:

(for horizontal lines)

(for vertical lines)
