Users, Groups & Authorizations

⚠️ **User Administrator**

You need to be a User Administrator to Manage Users, Groups and Authorizations.

Users

Please proceed to Manage Users.

Groups

Please proceed to Manage Groups.

Authorizations

Authorization objects are typically used to restrict access for users/groups to the data necessary for their field of work. This can be for example regional (by market, country, and continent), division (company code) or client based.

Please proceed to Manage Authorizations.

> ⓘ **Please Note**
>
> If you want to manage the user access to certain analysis objects (Projects, Analysis Documents, Data Models), please proceed to Permissions.
